

Atlantic Marine Construction - Child Development Centers/Youth Centers

The first CDC was completed in 2009 at West Point. By completion of the fourteenth building, we were acting as General Contractor under AMC - coordinating the foundations, paving, interior painting, drop ceiling and trim work, and assisting with the modular setting as well as the site work, utilities, water/sewer, curbs, sidewalks, drainage ponds, land clearing, grading, landscaping and site lighting. Upon completion of the Fort Drum Youth Center, we were awarded the construction of the Ft Drum BMX Track. Each job was completed on time and within budget with minimal punch list work. The projects were all coordinated within the schedules of active military bases.
