

Intercontinental Construction Contracting – JOC contracts at West Point

WPDC has worked for ICCI under the JOC program since 2006 completing various projects that include the Michie Stadium Renovations which involved demo and installation of sidewalks, trench drains, foundations, stairs, retaining walls, curbs, floors, bleachers, concession stands, framing, roofing, light pole bases and stamped concrete. We have performed bathroom and kitchen renovations at ODIA Quarters, working around the families, installed bluestone at the amphitheater, stamped concrete at the Golf Course and removed and replace the seating at Christl Arena and Tate Rink. These are all high activity locations and all construction activity was performed without disruption to daily life.
