

Walsh Construction – New Cadet Barracks

In 2013, WPDC was invited to bid on the erosion control work for the new Cadet Barracks at West Point. That success has turned a \$100,000 project into a \$14,000,000 project scope of work including the underground utilities, demo work, installation of storm, sewer and water mains, site concrete and the rock hammering and hauling out of materials to prepare the site for the new building.
