

West Point Associates of Graduates – Clinton and Doubleday Fields Site Lighting

General Contractor responsible for all aspects of construction to provide television quality sports lighting from submittals through As-builts and everything in between. Work included demo of existing light structures, installation of Sports Lighting Towers ranging from 65-100 feet tall, drilling and foundation installation, all primary and secondary electrical work, aiming and certification and protection and restoration of all areas including any disturbances to the playing surface. Job was completed on time and within budget. This included providing temporary power to use the field lighting for a baseball game that was scheduled prior to the completion of the job.
